

POST-LAB QUESTIONS  
HONORS CHEMISTRY

1. What was the brown/reddish material when the aluminum(s) reacted with the copper(II) chloride solution?
2. Why did the temperature increase when the copper(II) chloride was dissolved in water?
3. Why did the magnesium(s) react more vigorously than the aluminum(s) when heated?
4. Why did the magnesium(s) not react when placed in the copper(II) chloride solution?
