

Back to School Night 2018 Accelerated Integrated 3

1. **Grit and Resilience.** Struggling, failing, and succeeding help the brain grow and develop. These are all things that we have to deal with as adults.
2. **My School website.** Student help can be found at the My School website. Worked out solutions are posted.
3. **Students' grades are weighted at 6% participation, 10% assignments, 64% assessments, and 20% final exam.**
4. **Chapter Test Retakes.** Up to three a semester.
5. **Assignments should be completed a couple of times until they understand them.** Assignments are not done just because they answered all of the questions.
6. **This is the second year for the class so course pacing is a challenge.** We will cover the rest of Int. 3, Conics, Matrices and an in depth study of Trigonometry. The last month I'm hoping to do a review of all the algebra learned so far.
7. **I'm available every day at lunch and office hours.** Please encourage your child to take advantage of this and test retakes.
8. **Students need to be active problem solvers!!** Students should not wait for problems to be solved for them. The biggest challenge of the class is multi-step problems. Math is not a spectator sport.
9. **Some students will take the SAT 2 Math Subject Test this year.** Most of the math that is on the test is covered up to this point. We will prepare them for the tests.
